PROJECTS

1. **Do Your Work**
   - A To-Do List web application which stores your work to be done.
   - It also stores data in your local storage so that it will not be lost when you close tab.
2. **Coefficient of Restitution Visualizer**
   - A java based application which simulates the ball and helps user to visualize how the coefficient of restituion works.
   - Also it prints height in the panel for experiment.
3. **Guess The Number**
   - This is a basic game for fun.
   - User have to guess the number generated by computer with the help of hints.
   - In every turn the range also changes.
